

Save money on your telecoms bills while helping AECB!

Phone Co-op values

The Phone Co-op is the fastest growing consumer co-operative in the country and now has over 13,000 customers. This is because they give their customers what they want: a low cost service, backed up by ethical, green values – your values.

As well as using recycled stationery and power from renewables throughout the business, they offset their CO2 emissions resulting from the connecting of their customers' phone calls. 75% of the mileage covered on business trips last year was by less environmentally damaging forms of transport such as train and bus. They also pay a proportion of their profits each year into a co-op development loan fund to help new and expanding co-operatives (£70,000 so far).

Benefits to AECB & to you

AECB receives 6% of the VAT exclusive amount you spend on calls, broadband and mobile calls. You benefit by using an ethical, co-operative for your telecoms, accountable to you and people like you, with your concerns always considered.

Services

Landline calls, broadband services, line rental & (for business only) mobile

Residential customers

There are packages to suit every type of residential telephone user. Please click on the link below to refer to The Phone Co-op website. You can use The Phone Co-op for your phone calls, broadband and line rental, in single combinations or in packages. Savings on calls will be up to 15% against BT and 5% on line rental.

Business customers

Business customers are advised to contact The Phone Co-op team direct to discuss their requirements. They can analyse your bill from your present supplier of phone &/or broadband services to check how much those services would cost with The Phone Co-op.
